MATE ROV QUALIFICATION RELEASE

FOR IMMEDIATE RELEASE

PRESS RELEASE

MATE ROV 2026 Qualification

Sequoia Marine Solutions

Sequoia Marine Solutions (SMS) is proud to announce that they have officially qualified for the MATE ROV 2026 World Championship! This is a momentous occasion, only possible because of the hard work and ingenuity of all 50+ members at California State University, Fresno. The ability to qualify for and travel to a competition in Newfoundland, Canada during SMS' first academic year as an established club is a testament to the Central Valley and the club's hosts, as well as a sum of over 4000 student hours of development, manufacturing, and testing.

Attached to this release are the sponsorship packet for SMS' host club, AVI Robotics, as well as the video of the qualifying run and ROV specifications. The ROV, or Remotely Operated Vehicle, was designed entirely by members of SMS and students of CSU Fresno, a team mentored by CSU Fresno Faculty members Alaeddin Bani Milhim & Dr. Shuo Wu.
